

# DIY SLIME

Squishy, gooey, made with care

## SUPPLIES

1/2 cup water  
1/2 cup white glue  
1 teaspoon Borax, mixed into 1/2 cup water  
Spoon  
Small Bowl

## DIRECTIONS

Mix water and white glue together in the bowl. Slowly add a small amount of the Borax-water solution to bowl and mix. Add more of the Borax solution to the bowl until the slime pulls away from the sides of the bowl. You will most likely not use the entire solution.

## EXPERIMENTS

1. Cut the slime with child-safe scissors
2. Place slime in a colander and watch it ooze through the holes
3. Make a ball of slime and see if it will bounce
4. Grab a piece of slime by a corner and hold it above a table. How long will it take for it to reach the table?
