

SALINE SOLUTION GLITTER SLIME

Supplies

Bottle of Elmer's Glitter Glue (6 oz.)

1 1/2 teaspoons (7.5 ml) baking soda

1 1/2 teaspoons (7.5 ml) eye drops or saline solution (contact solution) with Boric Acid or Sodium Borate in the ingredients - We used Bausch and Lomb ReNu Contact Solution.

Spoon

Mixing bowl

Directions

Empty the bottle of glitter glue into a mixing bowl.

Stir in the baking soda. Mix well.

Add contact solution and mix until slime forms. You'll notice it comes together immediately, and takes a few minutes to fully form.

Knead the slime with your hands to get it to a consistency you're happy with.

EASY SLIME WITH BORAX

Supplies

8 oz. bottle Elmer's school glue

8 oz. (225 ml) water

1 teaspoon (5 ml) Borax mixed into 1/2 cup (120 ml) of warm water

Food coloring or liquid watercolors

Spoon

Mixing bowl

Directions

Mix the glue and water together in a mixing bowl.

Add a few drops of color, if desired.

Slowly mix a bit of the Borax solution into the water-glue solution.

Keep adding small amounts of the borax solution to the water-glue solution until it comes together to form slime.
